Project #1 – Feedback - 50/50

CIS 204 - Locke - Tue 6pm-8:50pm

1. **Project Requirements Procedure**
   Procedure HERE : http://goo.gl/Ob2X75
2. **Project Description**
   a. **R01_001**: Setup the "Requirements" script (10 points):
   b. Command exploration (20 points):

       i. For *each* of the commands below...
       ii. **R01_002**: Using the `vim` editor, create a text file named `commands_1.txt` and write a 2-3 sentence summary *in your own words* from the manual page `DESCRIPTION` section for *each* command. Include major features of the command. Be sure to use good grammar and sentence structure. Think of this as if you were writing information that a very beginning Unix/Linux user could understand.
       iii. **R01_003**: Write a summary *in your own words* from the manual page for any of your favorite 2 command `OPTIONS` **for *each* command** above in section 2.b.i.
       iv. Use the following command...
   c. File and directory manipulation (20 points):
       i. **R01_004**: Make the following directory structure...
       ii. **R01_005**:
           1. ...
       iii. **R01_006**: Now change... `file_1` ...
       iv. **R01_007**: Now change `file_5` ...
       v. **R01_008**: With **one command**, copy the entire structure...
       vi. **R01_009**: Display the entire structure you just created...

Your output and my comments:
